

## How do I measure radius corners for best results?

Shur-Lok® tarps are custom made to order and, as such, are nonreturnable. So correct measurements are essential for proper tarp fit! Please provide all requested information on the box detail sheets, or your order may be delayed.

To measure radius corners correctly, place a carpenter's square on the front radius of the trailer. Then measure at the point where the radius starts to arch around the front of the trailer.

For best results, do not use universal box sizes; always use actual physical measurements. Remember that box size and finished tarp size are not the same.

For additional information about Shur-Co® products, give us a call at **1.800.474.8756** Monday through Friday, from 8:00 a.m. to 5:00 p.m. Central Time. Our friendly and knowledgeable Customer Service Representatives will be happy to answer your questions. Or log on to our website at [www.shurco.com](http://www.shurco.com).
