

What is the new SMART1 +™?

The original SMARTransmitter®, with its simple-to-use five-channel interface and patent-pending flip lid has been upgraded to the **SMART1 +™**. The new **SMART1 +™** has the same basic functionality of the popular SMARTransmitter®, *plus* additional features our customers have been requesting, including 10 to 15 percent better range (line of sight).

Same features as the SMARTransmitter®:

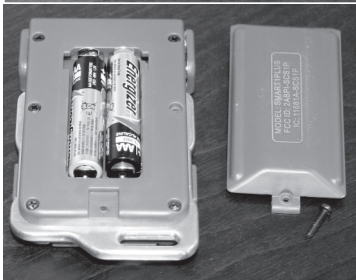

- Five-channel operation – switch between applications with SELECT mode button (each channel is labeled; the active one is identified by an LED light)
- Patent-pending flip lid cover provides protection for the buttons, prevents accidental operation and shuts off the transmitter to save battery life
- Allows turn-off of unused channels, so pressing the SELECT button only cycles between those systems you have installed
- Compatible with SMART1 LiteALL™

New features of the **SMART1 +™**:

- Battery compartment removes with one screw for easy access, easy replacement
- Uses two AAA batteries for longer battery life
- All channels have EXPRESS mode capability and can be enabled and disabled (on/off)
- Allows one-time operation in EXPRESS mode, even if you don't want it all the time
- EXPRESS mode indicator light shows if a channel is operating in, or set to, EXPRESS mode
- Press any button or simply close the lid to stop EXPRESS mode operation
- Provides automatic turn-off if a stall condition is detected, guarding against damage to tarp, motor and other system components

The **SMART1 +™** can be used in standard “press-and-hold” functionality on any Shur-Co® electric system, but to fully operate in EXPRESS mode, it must be used with the 4500 Series HD and/or ProTrap® motor*, and a connection to the motor encoder is required.

*ProTrap® systems purchased between 2009 and 2012 may not have motors equipped with motor encoders.

Above: The SMART1+™ transmitter is compact and easy to operate. Inset top: Patent-pending flip-style cover has the SMART1+™ insignia. At bottom: Runs on AAA batteries for longer life; back removes with a single screw for easier battery replacement.

For additional information about Shur-Co® products, call us at **1.800.474.8756** Monday through Friday, from 8:00 a.m. to 5:00 p.m. Central Time. Or log on to our website at **www.shurco.com**.
