

PREMIUM BELT & RATCHET

SC008FL-0819

FEATURES AND BENEFITS

- Aluminum Front and Rear End Caps
- 2" Ratchet Hold Down
- Easy-Off Tarp Stops
- Rope Return
- Square Key Crank Arm

If you're in the business of transporting light yet bulky materials like wood chips and refuse, you'll find a PBR the perfect tarping system. It allows you to heap your loads above the bows and still keep your tarp tight.

Belt & Ratchet cranks are available in 84" and 114" lengths. Hold-downs secure the tarp tube for uniform tension. These can be ordered as strap tie-downs in 7' or 9' lengths or as ratchets with optional quick-release straps. An improved crank key on the econo-joint offers easy crank installation and removal. You can also order a convenient leave-on option for the crank arm, allowing it to remain attached to the trailer with a wire lock or pin.

THE SHUR-CO® DIFFERENCE

HEAP ABOVE THE BOWS AND STILL KEEP THE TARP TIGHT

Pinless Offset Retainer

With this practical, economical upgrade, you eliminate all pin-and-cable hassles. Our adaptable hardware allows you to position the crank arm in the most efficient spot. It provides added security and can be used on either side of the trailer. The same bolt pattern is used for retrofitting convenience; compatible with the Shur-Flex™ crank arm.

Hold-Down Selection

Ratchet tie-downs are available in two styles: feed-through hooks and D-rings. For the first option, straps feed through ratchets. For the second, the hooks are positioned on a strap secured to ratchets and a D-ring is sewn on the strap. Slip the hook over the D-ring and tighten; a great time saver.

Cable tie-downs are also available in 7' and 9' lengths. These are fast and easy to use and are designed to stand up to constant use.

Flexible Easy-Off Tarp Stop

Super-strong construction – impact and abrasion resistant, yet maintains flexibility through temperature and moisture changes. Ideal for subzero conditions. Available in upright or 6" offset.

Ridge Straps

Both ridge straps and ridgepoles support the tarp along the length of the trailer, helping keep it on the end caps and extending tarp life. Shur-Co's ridge straps are constructed of tough, durable seat belt webbing that resists stretching in changing weather conditions.

Straps adjust with heavy-duty ratchets. Our rollaway ridgepole is galvanized steel with protective end caps. It slides into a pocket on the tarp, so it rolls up and off to the side as the tarp is opened. Using it allows bows to be spaced further apart while maintaining good tarp tension.
