

SHUR-SEAL™

PROTECTIVE COATING

A027FL-0620

Shur-Seal™ coating is clear in color and resists chipping and cracking better than any other protective layer on the market. It's the ideal choice for any fastener or manufactured part.

Shur-Seal™ coating outperforms regular zinc, zinc and yellow, galvanized and cadmium to both white and red rust conditions. It adds up to 10 times the life of standard zinc-plated parts.
